Détail de la formation :**Désignation :** Abacus360 Banking for Consultants - Online-Certification**Contenu et objectifs :**

With Abacus360 Banking, Regnology provides a scalable solution for regulatory and management reporting, risk calculation, and regulatory KPI control.

Implementing or enhancing regulatory reporting systems is complex. Banks face structural, data, and process challenges that require the support of specialized consultants with deep product and regulatory expertise.

The Abacus360 Banking Online Certification Program is designed to equip consultants with the end-to-end functional and technical understanding required to implement, configure, and support Abacus360 Banking in client environments.

It combines self-paced learning, knowledge validation, and instructor-led training, ensuring participants can move from product understanding to practical implementation readiness.

For consultants involved in Abacus360 client delivery, this certification provides objective validation of implementation expertise.

Learning objectives divided into 6 modules and a Instructor-led training (1 day)

- Understand the full Abacus360 Banking architecture and data flow
- Work confidently with the Abacus360 Banking data model
- Support client implementations and enhancements independently
- Configure processes, parameters, and validations

The written examination (2 hours) is taken on a separate date, at the earliest 3–4 weeks and no later than 6 months after the completion of the training course. The examination is conducted in a virtual session via a videoconferencing application tool.

The certification is valid for 1 year. Re-certification is available.

The training can also be booked individually as an in-house seminar.

Plan de la formation :

- Overview of reporting requirements
